Abstract of **JP 2003062401 (A)**

**PROBLEM TO BE SOLVED:** To provide a method for purifying a vital substance from a sample containing the vital substance by an inexpensive and simple method. **SOLUTION:** The vital substance is purified by a method comprising a step that a carrier for bonding the vital substance, a sample containing the vital substance and a solution for extracting the vital substance are mixed; a step that the carrier for bonding the vital substance is separated from the mixed liquid; and a step that the vital substance is isolated from the carrier for bonding the vital substance in an electric field. Thereby, the vital substance can be isolated from the carrier corresponding to an electric property of the vital substance.
